Liposomal iron capsule

Felip® 20, 30

01 Iron is an essential micronutrient and plays many important functions in the body:

Iron contributes to normal oxygen transport in the body. It contributes to normal formation of red blood cells and hemoglobin.

Iron contributes to normal function of the immune system and shows positive influence on the nervous system, as well as physical and intellectual functioning of the human.

Iron has a role in the process of cell division.

02 TYPES OF IRON AND ITS ABSORPTION

The key to maintain a proper iron level is that you get the right amount of it from a well-balanced diet daily, and if

necessary, from rational supplementation, because our body is not able to produce it on its own. However, this valuable microelement can be stored in the hepatocytes (liver cells), muscles and bone marrow.

Liposomal Iron is a product designed to support the optimal absorption of iron.

Liposomes protect the active ingredient from the harsh gastro-intestinal tract and the nutrient is delivered, targeted, directly to the body cells and achieves significantly higher absorption to the bloodstream than with traditional iron supplements.

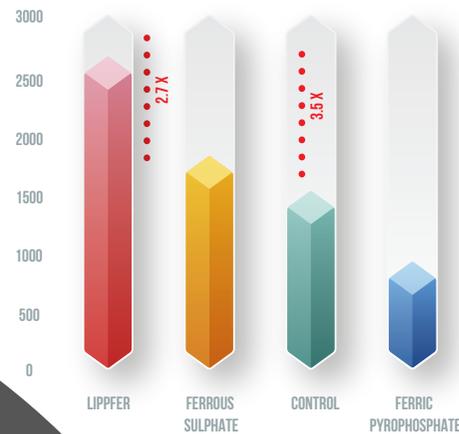

Felip® liposomal iron is a preparation with a high level of iron encapsulation in liposomes.

UNIQUE LIPOSOMAL FORM:

A proprietary technology and format allowing the iron to pass through gastric acid in the stomach for targeted absorption directly into the lymphatic system.

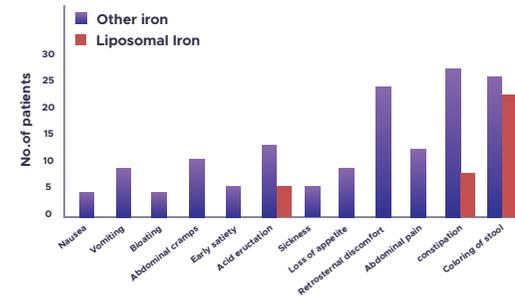

HIGH BIOAVAILABILITY &

ABSORPTION: Felip® Liposomal Iron Supplements is designed for high bioavailability. Absorption of liposomal iron is 3.5x times greater than free iron pyrophosphate, 2.7x times higher than iron sulfate, and 4.7x times higher than ferrous fumarate.

30 DAYS SUPPLY! LOOKING FOR A BETTER IRON SUPPLEMENT:

Felip® liposomal iron capsules is produced with microencapsulation technology. Our Iron capsules gentle on stomach and non-constipating. 30 capsules provide 1 months supply for you need.

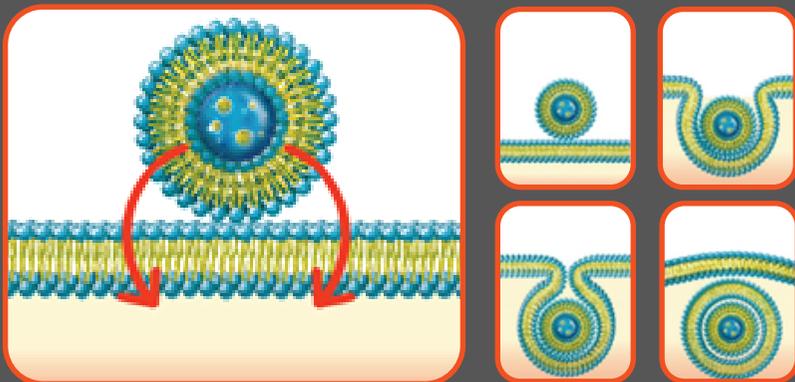

Features/Benefits

- Easy Swallow
- Odorless
- One-A-Day

Usage Instructions

- 1 capsule daily with a meal or as directed by your healthcare professional. This supplement is not suitable for children
- Keep out of reach of children.
- Store at room temperature (25C).

HOW DO LIPOSOMES DELIVER ACTIVE SUBSTANCES TO THE CELL?
